EDUCATION

CITY COLLEGE OF CALAMBA

Bachelor of Science in Computer Science

CALAMBA CITY

Graduation Date: May 2026

WORK EXPERIENCE

HANIN.TV

React & TypeScript Developer

Manila, Philippines

Jan 2026 - Present

- Delivered the React + TypeScript front end for hanin.tv, a live Korean community platform in 2 languages (EN/KO).
- Integrated 14 content sections with a database-driven backend, so new listings publish without UI rework.
- Optimized mobile-first layouts across all 14 sections, keeping the directory readable on the phones most visitors use.

PHILIPPINE NATIONAL POLICE (PNP)

Internship (450 hrs)

CAMP BGEN. VICENTE P. LIM, Calamba City

Dec 2025 - Mar 2026

- Executed usability testing across 10+ project iterations, driving a 25% reduction in user error rates.
- Implemented responsive components and all 4 CRUD operations with record filtering for core records management.
- Streamlined data presentation into organized views over 450 internship hours, improving day-to-day efficiency.

PROJECT EXPERIENCE

PERSONAL & ACADEMIC PROJECTS

BUDGET WATCH PH (Personal Project)

Manila, Philippines

Jan 2026 - Present

- Launched a civic-education tracker for the ₱6.793T 2026 PH budget, tracking 10 projects and flagging 5 for review.
- Automated status tracking for all 10 projects from reported dates, so unbuilt allotments read as no progress.
- Created source tracing for 100% of figures, pairing each with its published article and an as-of date.

ENERGYC (Personal Project)

Jan 2026 - Present

- Developed an Android app that splits one power bill across tenants through a 4-step reading-to-receipt cycle.
- Built rate validation that runs every 24 hours, keeping each tenant's share calculated at the current rate.
- Recorded all 4 stages (reading, bill, payment, receipt) in order, giving tenants a complete audit trail.

SHOPFUR (Thesis Project)

Jan 2025 - Dec 2025

- Engineered a React Native shopping app with an embedded Unity AR scene for placing and measuring furniture in-room.
- Designed the product preview flow end to end, from catalog browsing to in-room AR placement.
- Improved app stability by 25% through the API bridge, keeping AR placement intact when a tracking frame drops.

SKILLS

TECH: Frontend: React, React Native, TypeScript, JavaScript, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend & Tools: Laravel, PHP, Node.js, MySQL, Supabase, Firebase, Git, GitHub, Unity (AR)
