SUMMARY

Computer Science graduate and full-stack developer who builds and ships real, working products — including a live AI-powered web platform with active users. Strengths in React, React Native, and Node.js, and a track record of taking features from design through deployment with clean, usable interfaces and reliable code.

EXPERIENCE

Software Development Intern (450 hrs)

Dec 2025 – Mar 2026

Philippine National Police (PNP) — Camp BGen. Vicente P. Lim, Calamba City

- Designed and implemented responsive UI components for an internal system, focused on usability, clarity, and intuitive navigation.
- Built core application features including record filtering and full CRUD (Create, Read, Update, Delete) operations.
- Ran usability testing across 10+ build iterations, pinpointing recurring pain points and refining the interface to cut user error rates by roughly 25%.
- Structured data presentation for clean, organized output — improving navigation speed and overall system efficiency.

PROJECTS

EasyJobAIStatus — Live AI Job-Hunting Platform

Oct 2025 – Present

Junior Developer • Deployed & actively maintained

- Built, deployed, and maintain a **live AI-powered job-hunting platform** used by real users to track applications and research companies in one place.
- Integrated AI-driven recommendations that tailor job matches and company insights to each user's profile, moving beyond conventional keyword search.
- Owned the full lifecycle — planning, design, development, deployment, and ongoing maintenance — with an application-tracking workflow that helps users monitor status and prioritize opportunities.

ShopFur — AR Furniture Visualization App (Thesis)

Jan 2025 – Dec 2025

Lead Developer • Team capstone project

- Developed an augmented reality app that lets users visualize and measure furniture inside their own space before buying, supporting more confident purchase decisions.
- Connected a Unity AR layer to a React Native app through custom API integrations, building a stable architecture designed to scale with future features.
- Enabled shops to showcase products digitally, removing the need for in-person visits to judge fit, size, and style.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, PHP

Frameworks & Libraries: React, React Native, [Node.js](#), Laravel

Web & Data: HTML, CSS, SQL & NoSQL databases, REST APIs, AI integration

Tools: Git, GitHub, Unity (AR), Vercel / deployment

Strengths: Problem-solving, attention to detail, communication, adaptability, time management

CERTIFICATIONS

AI & Cloud: AWS – AI Security & Governance; Databricks – Generative AI; Google Cloud – Responsible AI; AI Fluency

Anthropic: Claude 101, Claude Code 101, Claude Code in Action

Web Development: Git Training; JavaScript (Beginners & Projects); Responsive Web Design; jQuery

EDUCATION

Bachelor of Science in Computer Science

May 2026

City College of Calamba — Calamba City
